-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

1. Claim 7 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 7 fails to depend on a previous claim.

2. Claims 26-29 are objected to because of the following informalities:

Claim 26 should depend on claim 25 instead of claim 13, since claim 13 is a method claim. Claims 27-29 have similar problem. They should either depend on claim 25 or 26.

Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-6, 12-25 are allowed.

4. Claims 7-11, 26-32 are objected but would be allowable if rewritten to overcome the objections set forth in this Office action.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-6, the prior art fails to teach or suggest a traffic shaper for use in determining transmission start times for network messages, the traffic shaper comprising "the scheduler configured to compute release times for the network messages; a memory controller configured to search the memory for computed release times, and wherein release times are computed and stored in the memory as information relating to the network messages is retrieved from the queues," in combination with other limitations, as specified in independent claim 1.

Regarding claims 13-20, the prior art fails to teach or suggest a method for shaping network traffic by selectively releasing network messages, the method comprising the steps of "computing a release time for each queue containing network message information; storing the computed release times in a time-searchable memory structure; upon expiration of a computed release time, dequeuing network message information from the queue corresponding to the expired release time" in combination with other limitations, as specified in independent claim 13.

Regarding claims 21-24, the prior art fails to teach or suggest a traffic shaper for use in determining transmission start times for network messages, the traffic shaper comprising "means for computing release times for the network messages; means for searching the memory for computed release times, wherein release times are computed and stored in the memory as information relating to the network messages is retrieved

from the queues," in combination with other limitations, as specified in independent claim 21.

Regarding claim 25, the prior art fails to teach or suggest a computer readable medium containing executable program instructions for shaping network traffic by selectively releasing network messages, the executable program instructions comprising program instructions for "computing a release time for each queue containing network message information; storing the computed release times in a time-searchable memory structure; and upon expiration of a computed release time, dequeuing network message information from the queue corresponding to the expired release time," in combination with other limitations, as specified in independent claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuongchau Ba Nguyen whose telephone number is 571-272-3148. The examiner can normally be reached on Monday-Friday from 10:00 a.m. to 2:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu can be reached on 571-272-3155. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
